Questions and comments from the Commission were heard and addressed by staff. Public comments were heard.

Action: Without motion, the Commission receives and files a staff presentation regarding solicitation for letters of interest – development parcels at Camarillo Airport.

D. Subject: Approval of, and Authorization for the Director of Airports or His Designee to Sign, Consulting Services Contract with Ninyo & Moore Geotechnical & Environmental Sciences Consultants for the Supplemental Per and Polyfluoroalkyl Substances Soil and Groundwater Investigation at Oxnard Airport for \$129,660.48

Recommendation:

Staff requests that your Commission/Authorities recommend that the Board of Supervisors (Board):

Authorize the Director of Airports or his designee to sign the consulting services contract with Ninyo & Moore Geotechnical & Environmental Sciences Consultants for the supplemental per and polyfluoroalkyl substances soil and groundwater investigation at Oxnard Airport for \$129,660.48.

Erin Powers, Deputy Director, presented the item to the Commission for its recommended approval and authorization to sign a consulting services contract with Ninyo & Moore. The presentation gave an overview of the services Ninyo & Moore would provide at Oxnard Airport related to Per and Polyfluoroalkyl Substances Soil (PFAS).

Action: Upon the motion of Commissioner Jerrold Abramson and seconded by Commissioner Bruce Martin, the Commission hereby approves the recommendations as stated in the respective agenda letter for item 7.D. All members voted and the motion passed unanimously 7-0.

8. DIRECTOR'S REPORT

Director Freitas opened the Director's report by sharing Heart Aerospace, a Swedish based company, relocated its headquarters to Irvine, California. Their team will be utilizing office space at the terminal at Oxnard Airport for 6-months, and will use 100x100 ramp space directly in front of the terminal. The large electric engines can accommodate 70 passengers. This development is in the realm mode of Advanced Air mobility that the Department of Airports is trying to encourage, specifically at Oxnard Airport.

On August 7th, the Canyon Fire erupted near the Ventura – Los Angeles County line. Camarillo Airport had a significant role in serving as a small helibase to support firefighting efforts. The helicopters arrived from the Los Angeles region to stage and prepare. Back-up units and our own (Ventura County Sheriffs Aviation and Fire unit) knocked that fire down within the first couple days. The fire was at a 91% containment in four (4) days, and 100% containment within seven (7) days. They did a fabulous job.

The Wings Over Camarillo Air Show was held on August 17th and 18th. The well organized and excellent event has a preliminary number 17,000 guests attended. The air boss did a fabulous job making adjustments when the weather did not cooperate in the morning. The Department did not receive any noise complaints over the two-day event. Jannette Jauregui, our Communications and Engagement Manager, did a fabulous job getting the word out in advance to the community. The air boss will do a full debrief at a future meeting.

Director Freitas shared the image of him participating in the Pivitol flight simulator. The 3-D goggles offer a real-life experience. During the Saturday event, Pivitol demonstrated a single person electric aircraft.

Ventura County Animal Services located at Camarillo Airport hosted its annual Clear the Shelters event on August 23rd. Animal Services reported they had a great turnout, and 68 animals found homes that day. That's approximately a week's worth of adoptions in a single day.

Erin Powers and her team working with Congresswoman Brownley's office secure a \$3-million grant for Oxnard Airport. The grant was backpay for the final work on Taxiway F and final paving project at Oxnard Airport. The cost was upfronted with no guarantee of reimbursement, but it was received and appreciated.

The Commemorative Air Force (CAF) is hosting the B-17 Sentimental Journey from September 22nd to September 29th. Public tours and rides will be available to the public and can be arranged on their website.

The Ventura County Criminal Justice Training Academy has requested from the Department of Airports to use of a portion of the abandoned runway for emergency vehicle operations class. Airport staff are reassessing that request and are working with our engineer consultants to determine if that would even be allowed. The training is held two times per year for its academy recruits.

In the months to come, the Department will be announcing the application process for the new Camarillo/Oxnard Airport Authority public member. The current public members Barbara Filkins and Scott Barer hold their current positions through February 28, 2026. The new public member cycle will begin in March of 2026.

Lastly, Director Freitas announces Lizet Kennel as the new Management Assistant for the Department of Airports.

Director's Report was received and filed.

Subject: Receive and File Staff Report Regarding Annual Wings Over Camarillo Air Show

Recommendation:

Receive and file a staff report regarding the annual Wings Over Camarillo Air Show at Camarillo Airport. The Department of Airports worked successfully with Wings Over Camarillo (WOC) leadership to successfully develop an excellent balance of air show acts that were embraced by event guests, the local neighbors, and the Ventura County Animal Shelter.

Fiscal/Mandates Impact:

This item is presented for information only and it does not require consideration by the Board of Supervisors at this time. There are no fiscal impacts associated with the recommended action.

Discussion:

The WOC Air Show has been held at the Camarillo Airport for more than 40 years. The Wings Over Camarillo is operated as a 501(c)(3) non-profit organization that has contributed more than \$650,000 to local non-profit entities over the last 13 years. It is important to note that the overall support for this annual event is extremely positive throughout the entire County of Ventura. Attendance at the two-day event was approximately 17,000 people, additionally, there are approximately 2,000 volunteers who provide support at the air show.

If you have any questions regarding this item, please call me at (805) 388-4200.

Subject: Receive and File a Monthly Staff Update from Communications and Engagement Manager Regarding Ventura County Airports

Recommendation:

Receive and file a monthly staff update from Communication and Engagement Manager regarding Ventura County Airports.

Fiscal Impact:

This item is presented for information only and it does not require consideration by the Board of Supervisors at this time. There are no fiscal impacts associated with the recommended action.

Discussion:

The Department of Airports is continuing its work to bridge the gap between the Department, pilots, and the community with a heavy focus on building trust and nurturing relationships with all stakeholders of Camarillo Airport and Oxnard Airport.

For more than three years, Department of Airports' staff have focused heavily on community engagement through a variety of projects including the creation and implementation of Fly Friendly VC, two Part 150 Noise Compatibility Studies, the Airport Layout Plan for Camarillo Airport, the initiation of an Approach and Procedure Analysis for Camarillo Airport, and the establishment of a robust and transparent communication system that is designed with both neighbors and pilots in mind.

In addition, the Department of Airports began a series of feature stories highlighting the unsung heroes in local aviation in September 2023. This series puts a spotlight on those who tirelessly serve the community and who also help educate the community about a portion of local aviation that is often overlooked. The goal of the stories is to provide insight to the economic and philanthropic contributions made possible by the existence of both Camarillo and Oxnard airports. Such contributions are often made under the radar and without knowledge to the general public.²⁰

The November 2025 story focuses on the Annual Aviation Career Day event, held in October each year, that this year served more than 1,000 local middle school and high school students, their teachers, and their parents. The event serves as a catalyst for the exploration of careers in aviation for countless youth throughout Ventura County.

Subject: Approval of the 14 Code of Federal Regulations Part 150 Noise Compatibility Planning Study for Oxnard Airport; Including Noise Exposure Maps and Noise Compatibility Measures Through 2042; and Authorization for the Director of Airports or his Designee to Make Minor Modifications to the Study Documents as May be Requested by the Federal Aviation Administration; and Find the Part 150 Noise Study Categorically Exempt from the California Environmental Quality Act (*Exhibit 1 is available for review at <https://oxr-noise-study.airportstudy.net/>*)

Recommendations:

Staff requests that your Commission/Authorities recommend that the Board of Supervisors (Board):

1. Approve the 14 Code of Federal Regulations (CFR) Part 150 Noise Compatibility Planning Study for Oxnard Airport; Including noise exposure maps and noise compatibility measures through 2042 (Exhibit 1);
2. Authorize the Director of Airports, or his designee, to make minor modifications to the study documents as may be requested by the Federal Aviation Administration (FAA); and
3. Find that the Part 150 Noise Study is categorically exempt from the California Environmental Quality Act (CEQA) under CEQA Guidelines Section 15262.

Fiscal/Mandates Impact:

The study does not result in an immediate fiscal impact. Anticipated fiscal impacts as outlined in Tables 7B and 7D (Exhibit 2) only occur if recommended measures are implemented. Future costs will be identified and included in each future respective budget for implemented measures.

Discussion:

On July 22, 2022, the Board authorized the Department of Airports (Airport) to enter into a consulting services contract with Coffman Associates, Inc., for a grant funded Part 150 Noise Compatibility Study. The objective of the Noise Compatibility Study is to provide the Department of Airports, surrounding communities, and public officials with a document outlining the baseline noise conditions and a plan to address noise-related impacts in the vicinity of the airport and surrounding communities.

Study Components

The study is made up of two parts: Noise Exposure Maps (NEM) and the Noise Compatibility Plan (NCP).

For the Noise Exposure Map portion of the study, types of aircraft, the noise levels and the impacts of air traffic currently using the airport and the long-range demand forecast were examined. The “current year” used in the study was 2022, the “near-future” year was 2027 and the “long-term” year was 2042. Computer-generated maps were developed for each of these periods showing the airport noise contours and various methods to reduce noise impacts on the surrounding communities. The Department even elected to add noise monitors in surrounding areas as a check and balance to ensure the modeling for the noise contours was accurate. The final noise contour maps reviewed and accepted by the FAA accurately depicted airport-generated noise, however, it only modeled noise within the 65 CNEL noise contour, an FAA threshold, and did not really address the communities’ experience and noise concerns. So, the Airport directed concerned community members to focus on the second part of the study, the NCP, where the Airport could focus on voluntary actions to address noise outside of the 65 CNEL threshold level.

The Noise Compatibility Plan portion of the study focused on identifying noise abatement alternatives, land use alternatives and developing a compatibility plan, both for FAA grant-eligible actions and for non-FAA grant-eligible actions to address the community noise concerns. The resulting Noise Compatibility Plan measures are identified in Exhibit 2, Tables 7B and 7D, which summarize the recommended noise compatibility measures to be approved by the Board as part of the study.

Public Outreach

Over the last three years since the study was initiated, public outreach has been a cornerstone of the study. A Planning Advisory Committee (PAC) was formed to provide suggestions and to gain consensus and support for the results of the study. The PAC members included local residents, Airport tenants and users, community officials and staff, local business and school district representatives, City of Oxnard representatives, the County of Ventura, and the Ventura County Transportation Committee; the Aviation Advisory Commission; airport user groups; the FAA control tower, Caltrans Division of Aeronautics and the FAA. In fact, any and all applicants who expressed interest were

included on the PAC. A total of four PAC meetings were held over the course of the study period.

Additionally, four public meetings (two information workshops, one listening session, one public hearing) were held in the community for additional feedback. The meetings allowed interested participants to acquire information about the 14 CFR Part 150 Study process, noise abatement, compatible land use planning, and noise compatibility program alternatives and implementation. Participants could also ask questions and express concerns. The meetings were intended to encourage two-way communication between Airport staff, consultants, and residents. All printed materials were provided in English and Spanish. Spanish and Mixteco interpretation services were also provided. During and following each public meeting, a public comment period was identified to collect comments. Throughout the study, regular updates were also provided to the Aviation Advisory Commission and Oxnard Airport Authority.

The 14 CFR Part 150 Noise Compatibility Study has undergone a thorough public review process with input from numerous stakeholders. Therefore, staff requests that your Commission/Authorities recommend the Board approve the study and authorize the Director or his designee, to make minor modifications to the study, if directed by the FAA after submission of the planning study.

Pursuant to Title 14 of the California Code of Regulations, Article 18, Section 15262, this study is categorically exempt from CEQA as a planning study.

Strategic Priority:

The 14 CFR Part 150 Noise Compatibility Study supports the County's Strategic Priorities to support fiscal responsibility, economic vitality, reliable infrastructure, and sustainability.

Subject: Review, Discuss and Recommend Modifications to Draft Language, Project Scope and Process Associated with the Request for Proposal to Improve Approximately 4.13-Acres of Land at Camarillo Airport; This Property Currently is Occupied by Forty-Nine (49) Small and Medium Size Aircraft Hangars

Recommendation:

Staff requests that the Camarillo Airport Authority review, discuss and recommend language that may be utilized by the Department of Airports for the upcoming Request for Proposals (RFP) to improve approximately 4.13-acres of land at Camarillo Airport. This property is occupied by forty-nine (49) small and medium-sized aircraft hangars. (Exhibit 1).

Fiscal/Mandates Impact:

Mandatory: *No*

Source of Funding: *Airport Enterprise Fund*

Impact on Other Departments: *None*

Discussion:

Ventura County Department of Airports recently received a letter of interest to develop a 4.13-acre site at Camarillo Airport. We then issued a solicitation for other competitive Letters of Interest (LOI) and received multiple LOI's in response. The next process, as required by the Federal Aviation Administration (FAA), is to issue an RFP.

It has been noted that the 4.13-acre site is currently occupied by 49 airport owned hangars that have an approximate age of 40 years. Currently, fifteen (15) of those hangars are vacant because of the prohibitive repair costs (Exhibit 2).

It has been recommended that the Department of Airports consider other options, such as hangar repairs, aside from just redeveloping the entire site. This agenda item was prepared to open dialog to discuss various options to improve the entire site. Specifically, the proposal asked of the Department of Airports to request that companies be contacted

that would be interested in repairing and or refurbishing these hangars in their current location. Below is the proposed RFP language that would open the property to all ideas regarding improving the existing 4.13-acre site, including repair:

Proposed RFP Language:

The Ventura County Department of Airports is issuing a Request for Proposal ("RFP") to solicit proposals for the improvement, development and or lease of an approximate 4.13-acre aviation only parcel of land at the Camarillo Airport, located on the airfield, east of Air 7 FBO and west of the Commemorative Air Force Facility (Exhibit 1)

The desired improvement/development proposal shall include aviation facilities beneficial to the community, airport users and customers, and shall include a proposal to repair or replace the existing 42 T-hangars of 1,050 square feet each and seven box hangars of 2,000 square feet each. Proposals for replacement of the referenced hangars may require another location on the airfield, as determined by the Department of Airports and the airport layout plan.

Proposals for repair of the existing hangars shall include the requirement to manage the hangar project and be responsible for all ongoing maintenance and repair.

If you have any questions regarding this item, please call me at (805) 388-4200.

**SOLICITATION FOR LETTERS OF INTEREST FOR DEVELOPMENT OF AVIATION PROPERTY
CAMARILLO AIRPORT, CAMARILLO, CALIFORNIA**

September 12, 2025

The Ventura County Department of Airports has received letters of interest to develop/redevelop two parcels of land at the Camarillo Airport. Now that we have recently completed our Airport Layout Plan Update, we are soliciting interested parties to lease and develop two sites at the Camarillo airport: 1) an approximate 4.13 acre parcel (180,000 SF) east of Air 7 hangar and west of the Commemorative Air Force West Hangar, which presently houses 42 County general aviation T-hangars and seven box hangars ("Location 1") and an approximate 90,000 square foot parcel located east of the Camarillo Air Traffic Control Tower (tower) and the present Orbic Helicopters facility ("Location 2"), generally as shown in **Exhibit 1**.

Camarillo Airport is a general aviation reliever airport, owned by Ventura County and operated by the Ventura County Department of Airports. Camarillo Airport is located south of US Highway 101 and north of the Pacific coastline, near the Camarillo Outlet Mall and Pt Mugu Naval Base. The airport is situated on 650 acres, of which 137 acres are dedicated to the non-aviation business park. There are currently four (4) fixed base operators ("FBO"), County-owned general aviation hangars and tie downs, privately owned general aviation hangars and private hangar developments with hangar sizes ranging from 3,000 – 25,000 square feet. The airport hosts the County Fire and Sheriff Air Unit as well as other County facilities and a privately operated Ultralight field. There are commercial services and operations including flight schools, charter operations, helicopter repair, mobile mechanics and avionics businesses. Annual operations in 2022 were 187,076 with 350 based aircraft.

Under the planning jurisdiction of Ventura County, the sites have ample outside the fence parking, access from Pleasant Valley Road and the Las Posas / Hwy 101 interchange.

Camarillo Airport Highlights:

- Runway Length: RWY 8/26 - 6,013' x 150'
- Runway Strength Maximum weight 115,000 lbs

- Full Parallel Taxiway
- Federal Air Traffic Control Tower
- Four Full FBOs: Channel Islands Aviation, Air 7, Avex and Sun Air.

If you are interested in providing aviation development, please submit a Letter of Interest by **12:00 PM on Friday, October 10, 2025** to:

Ventura County Department of Airports
555 Airport Way, Suite B
Camarillo, CA 93010
ATTN: Keith Freitas, Director of Airports

Letters of Interest may specify one or both parcels but must be an aeronautical use as defined by the FAA. Letters must identify the proposed use and approximate project size. If more than one letter of interest is received, criteria for further evaluation and information will be requested from all parties and a full competitive Request for Proposals (RFP) process may follow. If you have any further questions, please contact Madeline Herrle, Lease manager at (805) 388-4243.

Subject: Discuss Effectiveness and Efficiency of the Aviation Advisory Commission

Recommendation:

Discuss the effectiveness and cost benefit of continuing the Aviation Advisory Commission (AAC) for the Ventura County stakeholders in its current structure, including alternatives, such as dissolution, restructuring, repurposing, and other modifications.

Fiscal/Mandates Impact:

The fiscal impacts associated with this item involve the number of hours that the Department of Airports staff spends to prepare and attend each AAC meeting.

Discussion:

Ventura County purchased land and built its first airport in the City of Oxnard in 1934. In 1941, during WWII, Oxnard Airport was acquired by the U.S. for military use and then returned in 1945 to Ventura County. The Camarillo Airport was constructed in 1942 by the federal government for use by the Army Air Force and Marine Corps. Then in 1969 the Oxnard Air Force Base (Camarillo Airport) was declared surplus and ultimately deeded to Ventura County in 1976. From that point forward Ventura County has operated two airports (Oxnard and Camarillo).

The Ventura County Board of Supervisors established the AAC in the late 1960's, when Oxnard Airport was the County's only airport. The AAC's purpose has been to advise both the County Board of Supervisors and the Director of Airports on matters pertaining to the promotion, advancement, operations, finances, and policy of the airports.

When the County began the process of acquiring Camarillo Airport, formerly the Oxnard Air Force Base, from the Air Force in 1976, the City of Camarillo expressed concerns regarding the future use, development, and operation of the facility. In an effort to address these concerns, the County and the City of Camarillo established the Camarillo Airport Authority (CAA) through a Joint Powers Agreement (JPA). The makeup of the CAA included two members of the Ventura County Board of Supervisors, two City of Camarillo

Councilmembers, and one member of the public. The CAA's purpose, as identified in the Joint Powers Agreement, was to make recommendations to both the Board of Supervisors and the Camarillo City Council regarding the operation and development of the Camarillo Airport.

In 1980, the City of Oxnard determined that it would also like to enter into a JPA for the Oxnard Airport. That JPA, entered into in 1980, established the Oxnard Airport Authority (OAA), which has similarly made recommendations to the Board of Supervisors and the Oxnard City Council regarding the operation and development of Oxnard Airport. Because dissolution of the Camarillo and Oxnard Airport Authorities would require termination of the JPAs between the respective cities and the County, that option is not currently under consideration.

There has been some discussion/questions regarding the roles and purpose of the AAC, CAA and OAA. Airport staff provides a summary of the bylaws regarding the purpose of all three entities (AAC, CAA, OAA) as outlined below:

- Under bylaws established by the Board of Supervisors, the AAC shall advise the Board on matters pertaining to the County Airports, and on matters of promotion and advancement of the orderly development of air transportation in Ventura County. The AAC shall advise the Director of Airports on technical, operational, financial, and policy matters pertaining to the Airports.
- Under the Camarillo Airport JPA, the CAA is to make recommendations to the Camarillo City Council and the Ventura County Board of Supervisors on policy matters relating to Camarillo Airport operations and development, and policy matters regarding land use matters within the Camarillo Airport Zone.
- Under the Oxnard Airport JPA, the OAA is to consider and recommend to the Oxnard City Council and the Ventura County Board of Supervisors appropriate standards for operations at the Oxnard Airport and development around the Oxnard Airport, so that operations and development are compatible with each other.

Although the purpose of each entity is worded differently, the historical practice has been that all three bodies review, consider, discuss, and provide input on all matters related to the two County Airports. None of these three bodies is required by state or federal law.

During the Board of Supervisors (Board) meeting that took place on February 1, 2022, airport staff was directed to evaluate whether the Commission and Authority meetings should be combined or if there is another effective and efficient option for both meetings. At the direction of the Board, airport staff brought this item for discussion before the AAC on November 7, 2022 (Exhibit 1). Subsequently, the only change that was made was to the AAC meeting day of the month to ensure that the meetings were held during the same week as the Airport Authority. This provided better staff efficiency with having both

meetings held on the same week, with back-to-back night meetings.

Then during the AAC meeting that took place on July 9, 2025, Vice Chair Matthew Johnston advised that he had spoken with Chair John Corneau regarding putting an agenda item on a future meeting agenda to evaluate the effectiveness and efficiency of the AAC. Vice Chair Johnston commented about the public's rare attendance at Commission meetings and that there appears to be duplicative efforts by staff to prepare identical agendas for the Commission and Airport Authority meetings (Exhibit 2). The two Commissioners believed that staff time could be put to better use. It was also requested that staff conduct research to see if other County agencies use advisory bodies and the number of advisory bodies they have in place.

To prepare for today's discussion, all staff who participate in the Commission and Authority meetings completed a survey to identify their time spent preparing and attending both meetings. In summary, for meetings with numerous agenda items that are highly complex, staff may spend up to 119 hours preparing for and attending the Airport Authority meetings; staff costs associated with meetings of this nature is estimated at \$8,000 per meeting. Staff time to prepare for meetings of this nature with respect to just the Aviation Advisory Commission meeting may be up to 38 hours; staff costs associated with a meeting of this nature is estimated at \$2,300 per meeting. As previously mentioned, staff's attendance and prep time depends on the agenda for each meeting. For instance, at the January 2025 meetings of the AAC and CAA/OAA, only four staff members needed to attend these meetings resulting in staff time of approximately 58 hours for the CAA/OAA meeting and approximately 20 hours for the AAC meeting. However, at the March 2025 meetings of the AAC and CAA, ten staff members needed to attend these meetings resulting in staff time of approximately 119 hours for the CAA/OAA meeting and 38 hours for the AAC meeting. Meetings requiring attendance by County Counsel or other County agency staff incur additional costs, as staff time from those agencies is billed to the Department of Airports. The hourly rate charged by County Counsel is \$273 per hour. Please note that the estimate of staff hours and costs noted above do not include the time that is needed for County Counsel to review items that are placed on the agenda.

Staff also surveyed County agencies/departments to learn more about their approval process and whether they have an advisory body (Exhibit 3). In summary, the majority of County agencies/departments including Agriculture/Weights & Measures, Child Support Services, Fire Department, General Services Agency (see caveat noted in Exhibit 2), Harbor Department, Health Care Agency – Ambulatory Care, Health Care Agency – Behavioral Health, Health Care Agency – Public Health, Human Services Agency (see caveat noted in Exhibit 2), Information Technology Systems, Library, Medical Examiner's Office, Public Defender and Public Works go directly to the Board of Supervisors to move work forward. The General Services Agency – Parks Department, Human Services Agency – Area Agency on Aging, Human Services – Workforce Development Board, and Health Care Agency - Animal Services each have one Commission/Council. The Probation Agency and Resource Management Agency each have several Commissions/Committees/Boards with a note that each Commission/Committee/Board

only meet when approval is required by the Board of Supervisors. Unlike the AAC, CAA, or OAA, some of these advisory bodies, and their duties, are established by state law. Staff also surveyed seventeen (17) local airports to learn more about whether each has an advisory body (Exhibit 4). The Los Angeles Aviation Commission provides input for Brackett Field Airport, San Gabriel Valley Airport, and Whiteman Airport. Excluding these airports, below is a summary of staff's findings for the remaining fourteen (14) airports that were surveyed:

- John Wayne Airport has two (2) advisory bodies. One body has voting authority and one body is informational.
- Eleven (11) airports have one (1) advisory body. Of the 11 advisory bodies, four (4) bodies have voting authority and seven (7) bodies are informational.
- Two airports have zero (0) advisory bodies.

Regarding public attendance at the AAC and CAA/OAA meetings in 2024 and 2025 (Exhibit 5), below is a summary of staff's findings:

	AAC	CAA/OAA
2024	31	52
2025 to date	33	29

It appears the main question the AAC must answer is what is the best use of Airport staff time for the County Board of Supervisors and Department of Airports to effectively receive feedback/input from stakeholders. Does the current structure best accomplish that, given the role the Oxnard and Camarillo Airport Authorities already provide, or is there a more effective role the AAC could play to better accomplish these goals? For example:

- Leave the AAC, in its current format, meeting 2 to 4 times a year
- Sunset the AAC as the Oxnard/Camarillo Airport Authorities accomplish its goals
- Assist in creating an Ad Hoc Community association meeting 2 to 4 times a year
- Have the Department of Airports hold quarterly Open House "Q & A" meetings

These questions are for discussion only at this time. Any vote on these questions, if desired, would need to be placed on a future meeting's agenda. And actual implementation of any of these options would require a vote of the Board of Supervisors, which alone has the power to alter the structure, powers, or existence of the AAC.

If you have any questions regarding this item, please call me at (805) 388-4200.

Subject: Consider Effectiveness of the Aviation Advisory Commission and the Camarillo/Oxnard Airport Authority

Recommendation:

Consider the effectiveness and use of resources in continuing to have both an Airport Advisory Commission (Commission) and a Camarillo/Oxnard Airport Authority (Authority).

Fiscal/Mandates Impact:

The fiscal impacts associated with this item involve the number of hours that airport staff spends every month to prepare for meetings of the Commission and Authority.

Discussion:

During the Board of Supervisors meeting that took place on February 1, 2022, airport staff was directed to evaluate whether the Commission and Authority meetings should be combined or if there is another effective and efficient option for both meetings (Exhibit 1). It is estimated that airport staff collectively spends twenty (20) hours per month preparing for the Commission meetings, and an additional five (5) hours per month preparing for the Authority meetings, depending on the complexity of the agenda items.

The Commission and the Authority have the authority to set their own meeting schedules. The Commission meets on the first Monday of the month at 7:00 p.m. with the exception of when a national holiday falls on the first Monday. The Authority meets on the second Thursday of the month at 6:30 p.m. with the exception of when a national holiday falls on the second Thursday. In an effort to streamline staff's time and resources, staff would offer that the Commission and Authority consider a reduced meeting schedule in 2023. The Department's recommendation is to move to a reduced meeting frequency where the Commission and Authority meet bimonthly beginning in January (e.g., meetings would take place in January, March, May, July, September, and November). It is

important to note that many of the items reviewed during the current monthly meeting schedule are repeat topics from the previous month's agenda.

If you have any questions regarding this item, please call me at (805) 388-4200.

Dear Camarillo Airport Tenant:

I hope this message finds you well. We want to share the news of our plans to solicit competitive development proposals for two separate parcels at the Camarillo Airport. We are taking this action after receiving development proposals for two separate parcels and to ensure that we follow FAA guidance.

The first proposal involves a parcel of land located directly southeast of the ATC tower, which is currently used for aircraft tie-downs. The second proposal is associated with property located east of Air 7 and includes 49 County-owned T-hangars (C-233 to C-281). However, nineteen of these hangars are vacant because they are unserviceable. Airport staff will expect that any displacement of small hangars would be accommodated at CMA in some manner.

Staff is planning to present this topic during both the September 10, 2025, Aviation Advisory Commission Meeting, and at the September 11, 2025, Camarillo Airport Authority meeting. Both meetings are hosted at the Department of Airports office at 555 Airport Way, STE B in Camarillo. You can also attend virtually via Zoom; the agendas and links are available on our [website](#). We hope to see you there!

Sincerely,

Keith Freitas, A.A.E., C.A.E.

Subject: Receive and File a Staff Presentation Regarding Solicitation for Letters of Interest – Development Parcels at Camarillo Airport

Recommendation:

Receive and file a staff presentation regarding solicitation for Letters of Interest – two parcels at Camarillo Airport.

Fiscal/Mandates Impact:

This item is presented for information only and it does not require consideration by the Board of Supervisors. There are no fiscal impacts associated with the recommended action.

Discussion:

Following the completion of the Camarillo Airport Layout Plan Update, the Department of Airports will now take up consideration of the interest expressed by current tenants to separately develop two parcels at Camarillo Airport (Exhibit 1). "Location 1" is the approximately 4.13 acres (180,000 SF) situated adjacent to the east boundary of the Air 7 leasehold. The current use of this parcel features County-owned individual T-hangars along with seven box hangars. A letter of interest was submitted expressing interest in leasing and potentially developing this parcel.

"Location 2" is approximately 90,000 Square Feet situated adjacent to the Orbic Helicopters leasehold. Orbic Helicopters has made inquiries and has submitted to the Department of Airports conceptual drawings of expanded facilities. The current use for this area is tiedowns. There is also a gate (V10) at that location.

Regarding Location 1, of the 49 County-owned hangars that are the all-metal "Port-a-Port" style T-hangars placed directly on the ground without foundations or drainage, 19 of these hangars are no longer in serviceable condition and are excluded from the inventory available for rent. The upkeep and efforts to extend the life of these hangars is becoming uneconomic. It is for this reason that when the new County hangars in the northeast area came available for lease, tenants in Location1 were offered the first opportunity to relocate. With this in mind, the Department of Airports will require that any

**SOLICITATION FOR LETTERS OF INTEREST FOR DEVELOPMENT OF AVIATION PROPERTY
CAMARILLO AIRPORT, CAMARILLO, CALIFORNIA**

September 12, 2025

The Ventura County Department of Airports has received letters of interest to develop/redevelop two parcels of land at the Camarillo Airport. Now that we have recently completed our Airport Layout Plan Update, we are soliciting interested parties to lease and develop two sites at the Camarillo airport: 1) an approximate 4.13 acre parcel (180,000 SF) east of Air 7 hangar and west of the Commemorative Air Force West Hangar, which presently houses 42 County general aviation T-hangars and seven box hangars ("Location 1") and an approximate 90,000 square foot parcel located east of the Camarillo Air Traffic Control Tower (tower) and the present Orbic Helicopters facility ("Location 2"), generally as shown in **Exhibit 1**.

Camarillo Airport is a general aviation reliever airport, owned by Ventura County and operated by the Ventura County Department of Airports. Camarillo Airport is located south of US Highway 101 and north of the Pacific coastline, near the Camarillo Outlet Mall and Pt Mugu Naval Base. The airport is situated on 650 acres, of which 137 acres are dedicated to the non-aviation business park. There are currently four (4) fixed base operators ("FBO"), County-owned general aviation hangars and tie downs, privately owned general aviation hangars and private hangar developments with hangar sizes ranging from 3,000 – 25,000 square feet. The airport hosts the County Fire and Sheriff Air Unit as well as other County facilities and a privately operated Ultralight field. There are commercial services and operations including flight schools, charter operations, helicopter repair, mobile mechanics and avionics businesses. Annual operations in 2022 were 187,076 with 350 based aircraft.

Under the planning jurisdiction of Ventura County, the sites have ample outside the fence parking, access from Pleasant Valley Road and the Las Posas / Hwy 101 interchange.

Camarillo Airport Highlights:

- Runway Length: RWY 8/26 - 6,013' x 150'
- Runway Strength Maximum weight 115,000 lbs

Increase in Aircraft Activity from Point Mugu

COUNTY of VENTURA
Department of Airports

Residents of Ventura County may notice an increase in aircraft activity and noise as Naval Base Ventura County (NBVC) Point Mugu hosts a large force test event. The increase in activity can be expected through September 21st, 2025.

Multi-service aircraft, surface vessels, and unmanned systems will be participating and will stage and launch from Point Mugu. Aircraft participating in the event will operate largely during regular airfield hours, but extended airfield hours will be required to support some test events.

Residents throughout the County, but particularly Camarillo and Oxnard, may experience increased noise levels during peak hours.

Join Us for a Public Meeting for the Camarillo Airport Approach and Procedure Analysis

COUNTY of VENTURA

Department of Airports

The Ventura County Department of Airports is conducting an Approach and Procedure Analysis (Study) for Camarillo Airport. This Study is a response to community input received during the County's ongoing Part 150 Noise Compatibility Study for Camarillo Airport. This new study focuses on evaluating how aircraft fly into and out of the airport under instrument flight rules, with the goal of identifying possible procedure adjustments that may help reduce aircraft noise. This Study will include technical evaluations, input from aviation experts, public meetings, and coordination with the Federal Aviation Administration (FAA).

Air Show again.

One of my favorite West Coast air shows, 2025 marked the 44th year of this event. I really like the friendly, local ambience of this show, with a busy flight schedule filled with local pilots.

A sea of chairs surrounds one of the last U.S. Navy Lockheed P-3C Orions. The last active-duty P-3 squadron transitioned to its replacement, the Boeing P-8A Poseidon, in 2020.

With more than 100 aircraft to see, and more than 50 taking to the air during the day, there was a lot for the 20,000 attendees to see over the weekend of Aug. 16-17 at Camarillo Airport ([KCMA](#)) in California.

A quartet of T-34 Mentors perform during the air show. The T-34 Mentor was a military adaptation of the Bonanza Model 35 design, capable of +10g and -4.5g loads.

KCMA happens to be the home of the Southern California chapter of the Commemorative Air Force (CAF), so there was no shortage of historic aircraft to see, especially with several aircraft from the Planes of Fame in Chino, California, attending.

A pretty warbird duo comes by show center for a photo pass. The P-38 Lightning is from Planes of Fame and the P-51 Mustang is part of the Palm Springs Air Museum collection.

“Pretty Polly” is a Bell P-63 Kingcobra, a fighter that was not accepted for combat use by the United States Army Air Forces, seeing combat with the Soviet Air Force instead. This is one of six airworthy survivors.

The Pacific Theater warbird formation photo pass with “Wall of Fire” pyro display was spectacular for the attendees and probably unnerving for local residents.

The ever-popular Wall of Fire. As a T-shirt at the show proclaimed: “An Air Show Without Pyro Is Just Another Fly-In.”

The Ventura County Sheriffs used one of its Firehawk helicopters for an impressive water drop demonstration.

Anyone on the announcer stand ask for water? A Ventura County Fire Department HH-60 Firehawk conducts a demonstration water drop. This is one of three former military Blackhawks acquired by VCFD and retrofited with a 1,000 gallon external fixed water tank with a retractable snorkel system.

A notable premiere was Pivotal conducting a flight demonstration with its unique eight-rotor Helix eVTOL (electric vertical takeoff and landing) aircraft.

A Pivotal Helix eVTOL conducted a flight demo at the Wings Over Camarillo air show. Apart from the rotors, there are few moving parts (no landing gear either). The Helix eVTOL can be yours for \$190,000.

Aaron Fitzgerald impressively rounded out the rotorcraft performances with the Red Bull Bo-105 helicopter doing maneuvers that are unnatural but impressive nonetheless.

Aaron Fitzgerald flings the Red Bull Bo-105 helicopter across the skies of Camarillo. This highly modified helicopter has a rigid rotor system that allows it to perform maneuvers that are impossible for most other helicopters.

For 2025, the slate of aerobatic performers included John Collver, Judy Phelps, Tony Higa, and local favorite Jason Somes.

Judy Phelps brings her Pitts S-2B past show center during the 2025 air show. Judy flew her very first air show performance here in 2011.

Jason Somes taxis out to perform for the hometown crowd in his Polish-built MiG-17F. Jason is type rated in 17 different aircraft, many of them warbirds.

It's always a treat to see a performer for the first time or with a revamp, like Sammy Mason, performing this year with a classic Stearman.

Sammy Mason makes an inverted photo pass in his classic Stearman. Perhaps Sammy will paint his name on the side upside down as he has on his other aircraft.

Proving size isn't everything, Torrey Ward performed in his diminutive Subsonex Microjet.

B-17 Sentimental Journey Coming to Ventura County

The Commemorative Air Force Museum Southern California Wing, which is based at Camarillo Airport, will be welcoming the *B-17 Sentimental Journey* tour the week of September 22nd. The tour is scheduled to end Monday, September 29th.

Residents can expect to see the Douglas B-17 Flying Fortress operational in the Ventura County area during its visit. One of only three B-17s in the world that are still flying, the aircraft can be expected to be seen flying lower and slower than what residents may see from other aircraft, which is typical for a B-17. The aircraft's unique engine will also produce a different sound than what residents may typically hear.

The *Sentimental Journey* tour is offering both ground tours and flights beginning Wednesday. Click [here](#) to learn more (Event%20Archives%20-%20CAF%20SoCal).

Update Regarding B-17 Sentimental Journey Tour

This notice is in response to yesterday's communication regarding the *B-17 Sentimental Journey* tour. Unfortunately, the tour to Camarillo had to be canceled due to mechanical issues with the B-17. The Commemorative Air Force Museum is hoping to reschedule the tour for 2026. We will certainly share information related to any updates to this tour.

FAA awards Camarillo Airport \$14.4 million for runway repairs

Makena Huey

Ventura County Star

Sept. 23, 2025, 5:30 a.m. PT

Key Points

Camarillo Airport's runway is more than 30 years old.

Keith Freitas, Ventura County director of airports, said federal funds will be used to help repave the runway.

The project is expected to begin in 2027, and an additional \$20 million is needed.

Funding from the Federal Aviation Administration will allow for much needed repairs at the Camarillo Airport.

The facility will use a \$14.4 million grant from the FAA's Airport Improvement Program, announced Sept. 19, to repave its runway, which is more than three decades old. The funding, one of the largest sums the Camarillo Airport has received, is part of a combined \$170 million awarded to 46 airports across California.

“As you can imagine, in airports the No. 1 critical thing to have is an operational runway,” said Keith Freitas, Ventura County director of airports.

The repairs, which will cover all 6,000 feet of the existing runway, are estimated to cost \$35 million, Freitas said.

The Ventura County Department of Airports, which oversees Oxnard and Camarillo airports, will rely on its own [budget](#) as well as additional grants from

the FAA to pay for the project, and work will begin once all the funding is available.

Repairs are expected to take place in early 2027, and Freitas said work will be completed at night so the businesses located at 555 Airport Way do not need to close during the day.

Pavement on runways is generally designed to last about 20 years. Though the current pavement is about 35 years old, Freitas said it is in good condition due to regular maintenance.

“But at a certain point, you can't keep doing that,” he said. “That’s why you have to keep ahead of it with projects like this.”

The project will not result in any operational change, such as to the length of the runway or the allowable weight of planes, said Freitas, addressing concerns many Camarillo residents share about increased air traffic and noise.

“The key message is nothing is changing for us,” he said. “We’re just replacing the old movement with new pavement so we can continue doing the business that we do.”

To Whom It May Concern:

On October 4th, 2025, an aircraft we believe is owned and/or operated NetJets Aviation Inc. departed Camarillo Airport (KCMA) at 3:17 a.m. The Federal Aviation Administration publishes a Supplement document which provides information to flight crews regarding local rules and restrictions. Crews must review this information prior to conducting flight operations. The Supplement states that takeoffs between 0800Z-1300Z (12:00 a.m. and 5:00 a.m. local time) are not allowed, without prior permission.

This restriction arises from a Joint Powers Agreement between the City of Camarillo and the County of Ventura, which has been in effect since Camarillo Airport opened as a civilian airport in 1976. The purpose of the restriction was, and continues to be, the reasonable quiet enjoyment of neighboring residents.

The County of Ventura requests that you and your flight crews assist us by not scheduling flight operations at Camarillo Airport between 12 a.m. and 5:00 a.m. Your compliance will help ensure that Camarillo Airport remains a good neighbor and continues to meet the air transportation needs of the region.

Firefighters rescue dog trapped in Ventura County flood control channel

KCLU | By [Lance Orozco](#)

Ventura County Fire Department

A firefighter rescued a dog trapped in a flood control channel in the Oxnard Plains during this week's big storm.

They used a ladder to reach the dog, which was wet and scared but unhurt.

Firefighters made an unusual rescue during this week's big storm in Ventura County.

A dog became stranded on a small island of plants and debris in a flood control channel on the Oxnard Plains. It was just south of Highway 101, near Camarillo Airport.

Ventura County and Oxnard firefighters extended a 35-foot-long ladder down an embankment, allowing a firefighter to climb down and rescue the wet and scared dog.

The dog was not wearing an ID tag and didn't have a microchip. It's a female pug, or French bulldog. The dog appears to be healthy.

It was turned over to Ventura County Animal Services, which will try to find its owner.

FlyHouse to acquire Sun Air Jets operator

Web Team Published October 16, 2025

FlyHouse has entered into an agreement to acquire Sun Air Jets, a Southern California-based aircraft management and charter operator. The transaction will add more than 100 aviation professionals to the Scottsdale, Arizona company's workforce.

The acquisition expands FlyHouse's maintenance, management and operational capabilities. Financial terms were not disclosed, and the companies did not announce a closing date.

FlyHouse will acquire Sun Air Jets' Federal Aviation Administration (FAA) Part 145 repair station certification. The certification enables in-house maintenance, repair and overhaul work and opens opportunities for third-party maintenance services.

Sun Air Jets operates facilities at Van Nuys and Camarillo airports in California, including a fixed-base operator (FBO) at Camarillo. FlyHouse will assume hangar, ramp and support facilities at both locations.

The acquisition adds multiple super-midsize and large-cabin aircraft to FlyHouse's owned and managed fleet. The company currently accesses more than 2,000 aircraft through its global charter network.

FlyHouse will integrate Sun Air Jets' Argus Platinum, IS-BAO and Wyvern Wingman certifications. The integration reinforces operational safety and regulatory compliance standards across the combined operation.

"Our agreement to acquire Sun Air Jets represents a move in FlyHouse's growth," said Jack E. Lambert Jr., chief executive officer of FlyHouse. "Owning a 145 repair station, an expanded fleet, and facilities at Van Nuys and Camarillo changes our capabilities. We've built FlyHouse to be the first ecosystem brand in private aviation — one that owns its infrastructure, integrates technology at every level, and delivers a service experience that's seamless end-to-end."

The transaction positions FlyHouse for international expansion by standardizing maintenance, safety and operational procedures. The company plans to meet European certification requirements and cross-border regulatory compliance.

Sun Air Jets' operations and personnel will integrate into the FlyHouse network upon closing. The expanded presence extends FlyHouse's reach in the western United States market.

Continuation of Customer Satisfaction Survey

COUNTY of VENTURA

Department of Airports

The Ventura County Department of Airports announced the launch of a customer satisfaction survey in October 2024, and we continue to offer the survey to the community to help ensure that the work we are doing, and the services we provide, are meeting the expectations of all stakeholders.

Responses from this short survey will provide Airports' staff with insights regarding all aspects of the Department including professionalism, accessibility, and communications. Your responses will help us better understand our strengths as well as areas in which we are not meeting expectations as we continue to strive to serve all who have a vested interest in both Camarillo and Oxnard airports.

This survey should take only a few minutes to complete. Whether you are a business partner, community member, customer, pilot, or tenant, your voice matters. We thank you for your time and commitment to helping us ensure you have a positive experience with the Ventura County Department of Airports.

Update Regarding OXR Radar Outage

COUNTY of VENTURA

Department of Airports

This communication is a follow-up to our notice posted Saturday, October 18th, regarding a radar outage affecting Oxnard Airport (OXR). The outage remains in place as the radar requires emergency repairs. The Federal Aviation Administration Maintenance team is working to expedite repairs, however the outage is not expected to be resolved until the end of next week.

In the meantime, the OXR tower team continues to prioritize safety and is limiting the pattern to only to only a few aircraft at a time. The goal is to maintain Fly Friendly VC protocols whenever possible, however it is important to note that the tower is also managing airspace that involves traffic coming from the north and from Camarillo Airport. This means that, for safety, there will be air traffic in both the left turn and right turn patterns.

The Department of Airports remains incredibly grateful for the ongoing partnership with our tower teams at both OXR and CMA and for continued communication from the community.

UPDATE: OXR Radar Now Fully Operational

COUNTY of VENTURA

Department of Airports

This notice is a follow-up to the radar outage at Oxnard Airport that was announced on October 18th. The emergency repair was completed by the Federal Aviation Administration's maintenance team and the radar is now fully operational.

The Department of Airports extends continued appreciation to the Oxnard Airport tower team for their work to safely maintain air traffic, especially during the outage, and for their continued commitment to Fly Friendly VC. We are also grateful for the open lines of communication from the community, which are critical to the work we do and to the success of both Camarillo and Oxnard airports.

CMA and OXR Awarded Grant Funding for Infrastructural Improvements

COUNTY of VENTURA

Department of Airports

The Federal Aviation Administration (FAA) recently announced that Camarillo Airport and Oxnard Airport are among several California airports that have been awarded grant funding for infrastructural improvements. The Ventura County Board of Supervisors and County Executive Officer, Dr. Sevet Johnson, were all instrumental in securing this funding for our local airports.

"Securing this kind of funding to ensure that our facilities remain infrastructurally sound is critical," said Keith Freitas, Director of the Ventura County Department of Airports. "Camarillo and Oxnard airports remain a vital part of Ventura County's transportation system and provide an annual economic impact locally of nearly \$300 million. We are incredibly grateful for the continued support of our elected officials and County Executive Officer and to be among the airports selected as recipients of this FAA grant award."

During this latest round of FAA grant funding, Camarillo Airport was awarded \$14.47 million to partially fund a runway rehabilitation project that will replace approximately 6,000 feet of 30-year old pavement. The start date of the Camarillo Airport runway rehabilitation project has

yet to be determined. Additionally, Oxnard Airport was awarded \$3.5 million, which was used to fund the pavement replacement of the main parallel taxiway.

Changes to OXR Tower Hours of Operation

COUNTY of VENTURA

Department of Airports

This communication serves as notice that the Oxnard Air Traffic Control Tower is experiencing staffing shortages and will be operating on a shortened schedule on Wednesdays and Saturdays only. The tower, which operates daily from 7 a.m. – 9 p.m., will be operating from 9:30 a.m. – 7 p.m. on Wednesdays and 8:30 a.m. – 6 p.m. on Saturdays. All other days of the week will continue with normal operating hours.

It is important to note that the towers at Camarillo and Oxnard Airports operate under the jurisdiction of the Federal Aviation Administration and not under the authority of the County of Ventura.

We will continue to keep all stakeholders updated with any changes to this schedule.

New FFVC Signage at OXR

The Ventura County Department of Airports recently added new Fly Friendly VC signage at Oxnard Airport. The signs, which are part of the pilot education element of Fly Friendly VC, replace outdated signage that was located at gates V4 and V5 off of 5th Street. A third sign was added for the gate off of Victoria Avenue to help ensure that Fly Friendly VC is accessible to as many pilots as possible.

The Department of Airports remains committed to Fly Friendly VC and to seeking ways to continue to educate both pilots and the neighboring communities about the program.
